A pioneer in climate resilience in the Democratic Republic of Congo

Founded in January 2020, Green Resilience Invest has established itself as a key player in developing and scaling up sustainable solutions to address climate challenges in Africa. Our unique approach combines local technical expertise, technological innovation, and green finance.

We collaborate with local communities, governments, and international partners to create resilient ecosystems that generate both positive environmental impacts and inclusive economic growth.

Vision

Green Resilience Invest (GRI) aims for green, resilient, and inclusive growth that benefits the people of Africa. We envision a continent where economic development and environmental preservation progress hand in hand.

Mission

Green Resilience Invest (GRI) has a mission to improve and strengthen the resilience of rural and urban populations by developing technological and indigenous approaches and innovations that promote sustainable land use practices, contribute to the reduction of greenhouse gas emissions, promote sustainable livelihoods, including job creation and the protection of biodiversity and ecosystems in Africa.

Range of action

Green Resilience Invest (GRI) is currently developing its projects in the Democratic Republic of Congo, where the company implements climate resilience solutions tailored to local realities. Building on this field experience, GRI is conducting technical and strategic studies with a view to progressively expanding its activities to other countries in Central and East Africa. This regional expansion aims to address the climate challenges common to these territories, while taking into account the specific ecological, socio-economic, and institutional characteristics of each country, in order to guarantee sustainable, inclusive, and high-impact interventions.

Our 12 programs

Integrated solutions for climate resilience

Each GRI program is designed to address specific climate change challenges while generating sustainable socio-economic benefits for African communities.

Zero-deforestation and inclusive agricultural supply chains

Renewable energy & clean cooking

Certified forests & responsible processing

Our 12 programs

Integrated solutions for climate resilience

Each GRI program is designed to address specific climate change challenges while generating sustainable socio-economic benefits for African communities.

**Afforestation outside of forests
& land restoration**

**Sustainable income ecotourism
and conservation**

**Drinking water & urban
sanitation**

Our 12 programs

Integrated solutions for climate resilience

Each GRI program is designed to address specific climate change challenges while generating sustainable socio-economic benefits for African communities.

Environmental Education & Communication

Marine pollution cleanup & wetland protection

Sustainable Cities and Eco-Friendly Transport

Our 12 programs

Integrated solutions for climate resilience

Each GRI program is designed to address specific climate change challenges while generating sustainable socio-economic benefits for African communities.

Climate finance & carbon market

Environmental and Social Impact Assessments (ESIAs)

Evaluation, analysis & eco-certification

Our measurable impact

Each figure represents a step towards a more resilient and sustainable Africa. Our impact grows every day thanks to our 12 integrated programs.

50,000+

Hectares of restored and protected land

120,000+

People positively impacted

1M+ t

CO₂ avoided or sequestered

3,500+

Green and sustainable jobs created

Invest and collaborate with Green Resilience Invest (GRI)

Are you an investor, landlord, company or institution?
Let's build resilient, profitable and measurable solutions
together to accelerate the ecological transition in Africa.

Investors

Sustainable yields + climate impact

Institutions
