Investing in green resilience in the Congo Basin

**Green Resilience Invest (GRI)** is an eco-friendly company specializing in climate resilience in Africa, combining innovation, green investments and nature-based solutions.

86, Avenue Croix Rouge, Q/Aketi, C/Kinshasa, Kinshasa  
29, Patrice Emery Lumumba, Ibanda, Bukavu, DR Congo

# Who are we?

Founded in 2020, Green Resilience Invest has established itself as a major player in developing sustainable solutions to address climate challenges in Africa. Our unique approach combines local technical expertise, technological innovation, and green finance.

# Pioneer of climate resilience in Africa

We collaborate with local communities, governments and international partners to create resilient ecosystems that generate both positive environmental impacts and inclusive economic growth.

# OUR VISION

**Green Resilience Invest (GRI)** aims for green, resilient and inclusive growth that serves the people of Africa. We envision a continent where economic development and environmental preservation progress hand in hand.

# OUR MISSION

**Green Resilience Invest (GRI)** has a mission to improve and strengthen the resilience of rural and urban populations by developing technological and indigenous approaches and innovations that promote sustainable land use practices, contribute to the reduction of greenhouse gas emissions, promote sustainable livelihoods, including job creation and the protection of biodiversity and ecosystems in Africa.
